EDUCATION

Rutgers University-New Brunswick

Bachelor of Sciences in Computer Science

Piscataway, NJ

Expected May 2028

- **Relevant Coursework:** Data Structures

Council Rock High School North

High School Diploma

Newtown, PA

Sep. 2020 – June 2024

- **Relevant Coursework:** AP Computer Science A, AP Computer Science Principles, AP Statistics

EXPERIENCE

Stock Associate

Russo's Market

Summers, 2022 – 2024

North Wildwood, NJ

- Ensured optimal store presentation by meticulously stocking shelves and fridges, enhancing product visibility
- Performed various janitorial tasks to maintain a clean and safe environment in both the kitchen and store
- Collaborated with team members to streamline stocking processes, increasing efficiency during busy periods

PROJECTS

RU Eating App | *Swift, SwiftUI*

Sep. 2024 – Present

- Created an iOS app that empowers Rutgers Students to view dining hall menus, enhancing their dining experience
- Utilized MVVM architecture for clean, maintainable code, ensuring efficient app performance and user experience
- Implemented SwiftSoup to parse and format web-scraped menu data, presenting it in a SwiftUI user interface
- Achieved over 200 downloads from the App Store, receiving positive feedback for its functionality and ease of use

Frontier Game | *JavaScript, HTML, CSS, Node.js*

April 2024 – Sep. 2024

- Developed a full-stack web game with a Node.js server backend and a JavaScript website frontend
- Implemented a four-player multiplayer system using the WebSocket protocol for client-to-server communication
- Designed and refined engaging gameplay inspired by a board game with an SVG-based user interface

Blackjack Game | *JavaScript, HTML, CSS*

March 2024 – April 2024

- Designed and developed a single-player blackjack web game that provides an engaging experience for users
- Implemented blackjack and betting mechanics with a minimal user interface for a smooth gameplay experience
- Conducted peer testing to refine gameplay mechanics and ensure a polished final product

Workouts App | *Swift, SwiftUI*

Sep. 2023 – March 2023

- Created an iOS app that enables users to log gym workouts, helping them monitor fitness progress effectively
- Utilized a native SwiftUI interface for a seamless and intuitive user experience, ensuring easy navigation
- Implemented CoreData to persist workout data, allowing users to log detailed information such as sets and reps
- Incorporated features for tracking progress over time, enhancing user motivation and engagement

Chess Game | *C#*

Jan. 2023 – Oct. 2023

- Developed a two-player console application for chess players, allowing them to compete in a classic strategy game
- Implemented an interactive chessboard that displays legal moves for each piece, enhancing player decision-making
- Utilized object-oriented programming principles to structure the game logic and ensure clean, maintainable code
- Conducted testing to refine gameplay mechanics and improve user experience based on player feedback

TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript, HTML/CSS, Swift, Nix

Frameworks: Node.js, SwiftUI, Java Swing, Windows Forms

Developer Tools: Git, Linux, VS Code, Visual Studio

Libraries: CoreData, SwiftData, SwiftSoup, ws
